Introduction

ArchSite combines data from the South Carolina Department of Archives and History (SCDAH) and the South Carolina Institute of Archaeology and Anthropology (SCIAA) to provide researchers access to information on the state's archaeological and built heritage via the Internet.

Funding for the development of ArchSite was provided by the South Carolina Department of Transportation and the Federal Highway Administration.

Results

Results from searches include information about each resource. The National Registry features include a URL to the resource page on the SHPO website and the Archaeological Sites contain some site form information and will display all site form information as the data is digitized.

Results can be:
- Printed as a list
- Printed as a map
- Emailed as a map
- Exported as a shapefile
